AUTHORISED ASSISTANCE

The authorised assistance on the product is performed directly by VperVolume S.r.l or by a technician appointed by the same. If necessary, It will be possible to contact the assistance by using the contact information indicated in the previous paragraph.

PRESENTATION OF THE MANUAL

NOTE

AFTER RECEIVING THE PRODUCT, AND BEFORE DOING EVERYTHING ELSE, PLEASE READ THE FOLLOWING INSTRUCTIONS.

This manual contains instructions for the use and maintenance of the passive amplifier for smartphone **mod.Volume**. The manual is divided in several sections, each of which deals with a series of topics subdivided into chapter and paragraphs.

The index lists all of the topics covered by the entire manual. The page numbering is progressive, and each page has the corresponding number. This manual is intended for the responsible of the use and maintenance of the product and it is related to the service life limit after its production and sale.

In the case of a subsequently sold to third parties for any purpose (sale, loan of use or any other reason), the product must be delivered with all documentation included.

Before starting any operation, you must have read at least the entire manual and then you ought to deepen the topic related to the operations you intend to perform.

This manual contains proprietary and confidential information and it cannot be shared to third parties, not even partially, in any form and any use without the prior written consent of the company VperVolume S.r.l.

VperVolume S.r.l. declares that the information contained in this manual are congruent with the specific security techniques of the passive amplifier for smartphone to which the manual relates.

A certified copy of this manual is deposited in the product's technical leaflet, kept at VperVolume S.r.l.

VperVolume S.r.l. does not recognize any documentation that has not been produced, released or distributed by itself or by its authorized representative.

The following manual, as well as the entire leaflet, would be kept by the manufacturer for the period contemplated by the law.

During this period, it would be possible to request a copy of the documentation that accompanies the product, at the time of sale.

The entire technical leaflet remains available for that period, only for supervisory authorities, which could require a copy.

After this period, it will fall upon the customer to make sure that both the product and the documentation will respect the laws in force, at the time of inspection.

WARRANTY

The warranty rules are only valid if the product is used under the intended conditions of use.

Not including the measures described at the **MAINTENANCE AND CLEANING** section and performed with the procedures set out, any repair or modification made to the product by the user or by non-authorized companies will lead to relinquishing of the warranty.

The warranty does not extend to damages caused by malpractice or negligence in the use of the product, or by bad or omitted maintenance.

The products we sell are covered by warranty, but only with the respect of the following conditions, related to the product:

1	The warranty is valid for a period of 12 or 24 months, depending on the type of the buyer (legal or private).
2	The manufacturer bears the responsibility to replace at its own discretion the malfunctioning parts or parts of wrong production, only after an accurate control and a bad feedback.
3	The buyer shall always bears the shipping and/or shipping costs in case of incorrect use of the warranty terms.
4	During the warranty period the replaced products become producer's property.
5	Only the original buyer can be the collateral taker, and only as long as the original buyer has followed the maintenance instructions described in this manual.

	Our warranty liability expires if any of the following takes place: the original owner transfers proprietorship to an external party, or the product undergoes unwarranted modifications.
6	The warranty does not cover damage caused by subjecting the product to excessive stress, including but not limited to usage after noticing any anomalies, inadequate exercising methods, and failure to follow the instructions of usage and maintenance.
7	. The manufacturer accepts no liability for any difficulties that may arise in reselling or using the product abroad due to the regulations in force in the country where the product was sold.
8	The defective product or part of it must be delivered at the customer 's own expense to the manufacturer for replacement and will not be replaced without proof of purchase (invoice, copy of payment); otherwise the replaced part will be charged to the buyer. if it is deemed necessary to use the purchase warranty, please provide the following information:

Notice: if it is deemed necessary to use the purchase warranty, please provide the following information:

1	Typology
2	Date of purchase (submission of purchase document)
3	Detailed description of the problem

NOTE

FAILURE TO COMPLY WITH THE METHODS OF INTERVENTION AND USE OF THE PRODUCT DESCRIBED IN THIS DOCUMENTATION WILL INVALIDATE THE WARRANTY TERMS.

GENERAL SAFETY INSTRUCTIONS

Warning

If any part of the documentation is missing or illegible, please consult VperVolume S.r.l. before performing any further operations on the product.

This chapter describes the general safety rules to be observed during any operation performed with the passive amplifier for smartphones. The intervention procedures, described in the following chapters, must be carried out in compliance with both the execution methods indicated and the general safety rules of this chapter. The procedures described are also a supplement to the occupational safety regulations when the passive amplifier for smartphones is used in a professional environment.

Different countries may have different safety regulations. It should therefore be noted that in all cases in which the regulations in the documentation are in conflict or reductive compared to the regulations of the country in which the product is marketed, the regulations of the country will have priority over those in the documentation.

NOTE

THE MANUFACTURER CANNOT IN ANY CASE BE HELD RESPONSIBLE FOR ACCIDENTS OR DAMAGE RESULTING FROM THE INAPPROPRIATE USE OF THE PRODUCT, AS WELL AS FROM THE NON-OBSERVANCE, EVEN PARTIAL, OF THE SAFETY REGULATIONS AND INTERVENTION PROCEDURES DESCRIBED IN THE DOCUMENTATION.

Failure to comply with the rules of use and maintenance of the product contained in the manual will also result in the cancellation of the warranty terms.

DESCRIPTION

The product in the document and called "Volume" is a passive acoustic amplifier for smartphones, made of silicone. It has been studied and designed to increase the volume of the sound output from the smartphone and/or mobile device on which it is used. The product is suitable for any type of smartphone and/or mobile device and can be used in both indoor and outdoor environments.

Its main features are three:

- It can increase the device volume up to 8 decibels, thanks to its proprietary cone shape.
- It interfaces with the social application "SENTI CHI C'È" of VperVolume.
- Its physical and material properties make it highly crushproof, washable and transportable.

The product does not need any power supply.

INTENDED USE

The product is intended to be used as an acoustic amplifier for mobile devices.

NOTE

THE MANUFACTURER CANNOT BE HELD RESPONSIBLE FOR ACCIDENTS OR DAMAGE RESULTING FROM UNINTENDED USE OF THE PRODUCT. IN ADDITION, ANY UNINTENDED USE WILL RESULT IN THE DECAYING OF THE WARRANTY TERMS.

Residual Risk

During the planning phase, the manufacturer VperVolume S.r.l. has made a detailed risk analysis of the product concerned. This analysis showed that there are ineradicable risks due to their nature. Those risks have been individually examined and in the following manual the indications on how to avoid them have been emphasized. For this reason, It is important that any subject who wants to use and to maintain the passive amplifier for smartphone, has previously read the manual.

NOTE

THE MANUFACTURER CANNOT BE HELD RESPONSIBLE FOR ACCIDENTS OR DAMAGE RESULTING FROM UNINTENDED USE OF THE PRODUCT AS A RESULT OF NEGLIGENCE BY THE USER.

In particular:

- It is absolutely forbidden to make any changes to the product. Any damage to people, animals or property generated from the use of the product wrongly modified by an unauthorized operator, relieves the manufacturer of any liability.
- Please preserve with care the following manual, because It is necessary for a correct and safe use of the product.
- If the structure of the passive amplifier for smartphones is broken or damaged as a result of an accidental impact, making it dangerous or assuming that it cannot be used, you must contact authorized customer service and follow their instructions.
- Do not make the product available to children for ludic purposes. It is not a toy.
- Dispose of the packaging material in accordance with the legislation in force in the area of use. Never make the product packaging available to children.

UNPACKING INSTRUCTIONS

The supplied passive amplifier for smartphones is assembled inside a cardboard box.

Take the passive amplifier for smartphones gently out of the packaging to avoid damaging it and dispose of the packaging according to local regulations.

Make absolutely sure that the packaging is not made available to children.

LOCATIONS

It is good to bear some aspects in mind before positioning the product, in particular it is necessary to check certain factors:

- The area in which the product is to be used and stored must be chosen so that it cannot be affected by steam jets or corrosive liquids.
- The area of use and storage of the product must be chosen so that it is not exposed to open flames, heat sources and atmospheric agents
- It can be used both indoors and outdoors.
- The temperature range of use must be between +50°C and -15°C.
- The storage temperature range must be between +30°C and -5°C.
- Humidity conditions between 0% and 90%.

Silicone has an excellent resistance to high and low temperatures, at which it maintains its physical and mechanical characteristics unchanged, it offers high resistance to the action of atmospheric agents, such as UV, ozone and numerous chemical substances, it does not age, it can be easily pigmented, it's suitable for contact with food, it's an excellent electrical insulator and it's potentially biocompatible. Silicone rubbers have the peculiarity of being remarkably resistant to temperature, chemical attack and oxidation, they are excellent electrical insulators, and have low surface voltages. They are excellent non-stick, elastic, resistant to ageing and high temperatures.

HANDLING

Upon receipt, check the integrity of the product and its parts. If you find any damage, lack of something, deformation or traces of impact due to transport, notify the manufacturer before proceeding with subsequent operations.

The weight and dimensions of the product allow manual handling.

USAGE

Warnings

All products are tested and developed by VperVolume S.r.l. before shipping and delivery to the customer.

The passive amplifier for smartphones is designed, manufactured and tested to meet all specific standards (see the declaration of conformity), when used properly.

If the use and maintenance of the product is not carried out in a workmanlike manner, anomalies may occur during use and safety problems may also occur. Improper use and maintenance will invalidate the warranty terms.

Preliminary checks

Damage control

Check the product for physical damage due to impact or abrasion.

Check in particular:

- that there are no marks or dents and/or cuts, indicative of impacts during transport;
- that there is no trace of mould or other residues of dirt;

Damage Report

In case of physical damage, you must interrupt the procedure in progress and you must report the nature of the damage found at the customer support office of the manufacturer.

Use

Place the passive amplifier on a horizontal planeable to support the total weight, including the smartphone. Then, insert the smartphone with the speaker both facing down. The smartphone case must enter into the socket form inside of "Volume", so that the listening would be optimal as well as reported in the package insert.

The passive amplifier will immediately spread the sound from the smartphone.

The product does not need to be switched on to start working.

Interface to the application "SENTI CHI C'È"

"Volume" is sold with a QR Code that is necessary to associate the single object to the full functionality of the application downloadable from Google Play Store and App store. "Volume" is able, through the App "SENTI CHI C'È", to make people listen to music simultaneously through YouTube, Spotify, allowing more people to listen to the same song in the same moment. Thanks to that, "Volume" creates the possibility of meetings, contests and parties based on music.

People can, if they want geolocalize other people the other users of "Volume" and see what they are listening to, and eventually ask if they want to listen to a song together.

With two "Volume" apps running, the sound increases more and more. In addition, "Volume" also allows other users to join, allowing the formation of groups of many and many people who listen to music and follow the style they like the most.

One of the goals of "Volume" is to twist the idea that only the owners of sophisticated tools can be DJs. In fact, with "Volume", everyone can be the main character by livenning up a party or simply by choosing the music for everybody.

With "Volume" it is possible to meet the others not choosing the according to their physical appearance but according to the musical sensitivity of each one: driven by curiosity, the app allows you to meet the tastes of the others.

Through the use of the App "Senti chi c'è", VperVolumewants to discover new ways of communication by supporting the most known social in the world; in that way there is the creation of a new application based on a spontaneous creativity.

MAINTENANCE AND CLEANING

Regular maintenance

Periodically It is necessary to clean the passive amplifier for smartphone from a possible dust and dirt accumulation that may have formed on its external and internal surface. Eventually, It would be better to use a compressor to blow the dust within the product. It is possible to use also a damp non-abrasive cloth, free of alcohol or aggressive solvents. Do not use abrasive sponges, chemical solvents or cleaning agents.

Special maintenance

The special maintenance is required in case of breakage, unforeseeable accidents or an inappropriate use of the passive amplifier for smartphone.

The situations that may arise from time to time are completely unpredictable and for this reason it is not possible to properly describe the intervention procedures.

In case of need, please consult the technical service of the manufacturer to receive the appropriate instructions.

MOTHBALLING

The product is built and produced according to criteria of strength, durability and flexibility that allow you to use it for many years.

Once it has reached the end of its technical and operational life, it must be taken out of service in such a way that it can no longer be used for the purposes for which it was designed and built, making it possible to reuse the raw materials that make it up.

Disposal

The possibility of reusing some parts of the product depends to the total responsibility of the user.

Dispose of the product in plastic/differentiated waste. We recommend that you consult the waste collection centre located in your locality.

NOTA

THE MANUFACTURER IS IN NO WAY RESPONSIBLE FOR DAMAGE CAUSED BY THE PRODUCT IF NOT USED IN THE FULL VERSION AND FOR THE USES AND METHODS OF USE SPECIFIED IN THIS MANUAL. THE MANUFACTURER IS IN NO WAY RESPONSIBLE FOR ANY DAMAGE TO PERSONS OR PROPERTY RESULTING FROM THE RECOVERY OF PARTS OF THE PRODUCT USED AFTER ITS DISPOSAL.
